***Allowable Subject Matter***

1. Claims 28-34 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed bonded structures, particularly having the conductive filler fusion bonded to the first (and second) low melting point material.

As noted in Applicant's arguments filed on 5/10/04, Okano et al teaches that the electrically conductive particles are only partly fitted into the electrically conductive films to form a point contact (Column 9, lines 31-38). Additionally the electrically conducting particles, are not melted, deformed, or pulverized during formation of the bonded structure (Column 9, lines 50-52), hence there is no suggestion that the electrically conductive particles are fusion bonded to the electrically conductive films (low melting point materials).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
